

## Job posting

### 2 PhD positions (f/m/d)

You will perform cutting-edge experimental research visualizing ultrafast dynamics inside molecules by using high-power femtosecond lasers to direct

# „Molecular Movies“

**We offer** exciting PhD projects at a junction of physics and chemistry with a competitive salary (75% TV-L E13) and integration in an excellent research environment. BSc and MSc projects are also available.

**We seek** highly motivated students (physics, chemistry, or related field) with a keen interest in the microscopic world and an aptitude for research. A background in optics and programming skills are desirable.

Interested candidates please contact

**Dr. Matthias Kübel** for more information.
